full time - Java Backend Developer

Your tasks will be:

- You implement software components planned in sprints, which inspire the product owner and, after review, the team, and a little later our customers

- You analyse any errors that occur together with support and implement the right solutions

How you know you are a great fit:

- You have completed a degree with focus on computer science/IT and have several years of profession

- You are familiar with object oriented programming in Java and with designing and developing REST-based interfaces (we use JPA, Hibernate)

- Conceptual thinking is important to you, including structuring information and data. This applies to developing and integrating relational databases as well (we use JPA, Hibernate)

- In your work, you adhere to common best practises, ensuring that your code is understandable and extendable

- You ensure software quality by implementing unit and integration tests

- It would be great if you already have prior knowledge in version control with Git or CI/CD

How you can impress us:

- As an open-minded, communicative person, you enjoy working together in a team

- You can think conceptually but also have a healthy sense of pragmatism

- You like working in a team to create the best solutions. You enjoy systematically improving software and would like to acquire new technologies and tools

- You have solid knowledge of German and English

What we offer you:

- ✓ A broad and challenging range of tasks - with permanent employment and attractive salaray. You can immediatly see the results of our joint work

- ✓ An open corporate culture and framework in which you can fully contribute and develop personality, interest and strengths

- ✓ A collegial working atmosphere in which we support and learn from each other and celebrate our successes as a team

- ✓ Flexible working hours and generous home office opportunities
